DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,5,6, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Pant'012 et al.

a. See specifically figure 10, and column 7, lines 43-54. Platen insert 38 has a annular shape(since the outside thereof is circular) for fitting into an annular shaped recess of the platen 25b and functions as a porous material having a porosity sufficient to restrict air flow therethrough so as to reduce an amount of air required for a CMP operation.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pant'012 et al.

a. Pant et al is explained above.

Art Unit: 3724

b. Pant does not disclose the exact type of porous material recited by applicant.

c. However, the exact type of porous material would have been an obvious matter of design choice to one having ordinary skill in the art at the time the invention was made, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Allowable Subject Matter

5. Claims 9-14 are allowed.

6. Claims 3,4,7,8, and 16-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. The cited references disclose means for supplying air to a polishing member.
